The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3, 6-7, 89-93 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cohn et al (US 4,826,945) in view of Newkirk et al (US 4,094,797) and Sakai et al.

Cohn et al '945 teach multiblock polymers comprising diblocks of poly(hydroxycarboxylic acid) and poly(oxyalkylene) ethers (see abstract, with a or b equal to zero). Lactic acid is disclosed (column 4 line 66). However, the reference does not teach endcaps.

Newkirk et al teach the endcapping of polyoxyalkylene compounds with an aliphatic monocarboxylic acid (abstract). Improved resistance to oxidation is disclosed (column 2 lines 40-44). C1-24 monocarboxylic acids are specified (column 3 lines 39-40).

Sakai et al teach polyether-polyester block copolymers (abstract). Addition of trifunctional compounds to achieve crosslinking is disclosed (column 3 lines 3-11).

It would have been obvious to one of ordinary skill to endcap the terminal polyoxylalkylene block of the polymers of Cohn et al '945 to achieve the beneficial effect

Art Unit: 1616

Applicants argue that Cone et al '945 teach triblocks rather than diblocks.

However, as stated above, the reference teaches diblocks. See, in comparison, Cohn et al '958, which does teach triblocks.

No claims allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
